

SMP Transcoder SMP210T

Product Overview

The SMP210T is transcoder with multi-channel capacity and scalable capability from 2 to 12 real-time digital programs. Provides transrating and transcoding of SPTS/MPTS into H.264 SD or MPEG-2 multiplexing TS via embedded IP or ASI outputs. The dense design, low power consumption features and high-efficiency codec makes this equipment ideal for reducing installation space, long-term operating cost in content or distribution.
